Dallas, USA (Willing to relocate) | +1 9373293808 | divyadarshi11@gmail.com | [GitHub](#) | [LinkedIn](#)

SUMMARY

Software Developer with 2+ years building enterprise applications and AI-enabled solutions using Python, Java, and modern AI frameworks. Expert in LLMs, RAG, NLP, and Generative AI. Proven track record optimizing microservices, REST APIs, and cloud infrastructure (AWS). Agile practitioner with strong problem-solving and communication skills.

SKILLS

AI/ML & Generative AI: Large Language Models (LLMs), Generative AI, Retrieval Augmented Generation (RAG), NLP, Prompt Engineering, Fine-tuning, HuggingFace Transformers, TensorFlow, Scikit-learn, LLM Applications
Programming & Backend: Python, Java, JavaScript, SQL, FastAPI, Flask, Spring Boot, REST APIs, Microservices Architecture
Cloud & DevOps: AWS (EC2, Lambda, S3, DynamoDB, Athena, IAM, API Gateway), Git, Jenkins, Terraform, CI/CD Pipelines
Databases & Tools: MySQL, PostgreSQL, DynamoDB, Agile/SDLC, Jira, GitHub Copilot, Claude, Advanced Excel, PowerPoint

WORK EXPERIENCE

Verizon

Software Developer

Irving, TX

May 2025 – Aug 2026

- Engineered order management microservices using **Python** and **FastAPI**, processing complex telecom transactions including product purchases, service modifications, and customer self-service workflows in enterprise environments.
- Developed enterprise-grade migration utilities for third-party telecom product onboarding, automating manual integration workflows and reducing migration effort by 60%.
- Implemented **AWS Lambda**-based serverless order processing pipelines with optimized **API Gateway** integration, reducing service activation turnaround time by 35% while improving system scalability.
- Architected **AWS S3** integration solution for secure document storage and retrieval, enhancing data accessibility and reducing storage management overhead across enterprise systems.
- Optimized enterprise downstream workflows for order status synchronization, customer data management, and real-time service activation updates across heterogeneous systems.

University of Texas at Arlington

Research Assistant

Arlington, TX

Jul 2024 – May 2025

- Researched advanced **LLM** fine-tuning techniques using **Python** and **HuggingFace Transformers**, implementing domain-specific model optimization strategies that improved model accuracy by 15% over baseline benchmarks.
- Engineered automated **NLP** text preprocessing pipeline using **Python (Pandas, NumPy)** for large-scale dataset preparation, reducing data processing time by 30% and accelerating model training cycles.
- Conducted empirical research on **LLM** applications and model evaluation techniques, analyzing results and presenting findings to academic faculty and research teams.

Vector Interactive Studios Pvt Ltd

Software Developer

Remote, India

Aug 2021 – Aug 2022

- Built responsive **REST API** endpoints using **Spring Boot** for real-time data exchange, optimizing backend response times by 25% and improving system performance and scalability.
- Developed dynamic, responsive **ReactJS** interfaces using **React Hooks** and modern frontend patterns, increasing user engagement by 25% and reducing codebase complexity by 30%.
- Automated **CI/CD pipelines** using **Jenkins** for build, testing, and deployment processes, reducing release time and deployment failures by 20%.
- Independently owned end-to-end feature development in a startup environment, managing technical decisions and ensuring timely delivery of high-quality enterprise features.

PROJECTS

E-commerce Sentiment Analysis | Python, NLP, LDA, Tableau

- Executed sentiment analysis on 10,000+ product reviews using NLP techniques achieving 85% accuracy; built interactive Tableau dashboard with LDA topic modeling to drive data-driven business decisions.

Scholar Space | HTML, CSS, ReactJS, PHP, MySQL, Generative AI

- Engineered a full-stack LMS with role-based modules for 100+ users across Student, Instructor, and Admin roles; integrated generative AI to develop personalized practice tests improving study effectiveness by 40%.

EDUCATION

Master of Science in Computer Science — University of Texas at Arlington, USA

May 2024

Bachelor of Engineering in Computer Science — Chandigarh University, Mohali, India

July 2021
